

YASH KUMAR

FULL STACK SOFTWARE ENGINEER

Vadodara, Gujarat yashstro038@gmail.com +91 91064 27344 [LinkedIn](#) [GitHub](#) [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with proven experience in frontend and backend development, data science, and AI research. Skilled in building high-performance web applications using React, Node.js, Python, and Flask, with hands-on work on real-world projects including a Vercel-deployed full-stack platform and a published arXiv research paper. Recognized for delivering results ahead of schedule, improving data processing efficiency by 25%, and contributing to an ISRO national hackathon. Actively seeking opportunities to apply technical expertise, collaborate with teams, and grow in a dynamic software engineering environment.

WORK EXPERIENCE

Data Science Intern

May 2025 – Jun 2025

BrainyBeam

- Collaborated within a team of 3 to leverage Python, Pandas, and NumPy for preprocessing over 50 MB of raw data, improving analysis efficiency by 25% and saving 10 hours of manual cleaning per week.
- Developed backend scripts and a RESTful Flask API to serve predictive model results, increasing model accessibility and accuracy by 15% for web integration.
- Utilized Git for version control to develop data visualizations and integrated them into a functional website, delivering project milestones 1 week ahead of schedule.

EDUCATION

Diploma in Computer Engineering

Apr 2026

Parul University, Vadodara

GPA: 8.32/10 | CGPA: 7.63/10 | **Relevant Coursework:** Data Structures, Database Management Systems, Web Technology, Software Engineering, Python Programming.

TECHNICAL SKILLS

HTML5 / CSS3

JavaScript

React

Next.js

Node.js

Python

Java

Flask

REST APIs

PostgreSQL

Tailwind CSS

Pandas / NumPy

Git / GitHub

Backend Web Development

SQL

Artificial Intelligence

PROJECTS

Gym Website

2025

[Live Demo →](#)

Architected a high-performance full-stack gym website using React and Node.js, featuring a Vercel-deployed PostgreSQL database and JWT role-based authentication. Implemented a responsive dark-theme UI with Tailwind CSS and a class-booking system, achieving a 0.8s page load speed through performance optimization techniques including image compression, code minification, and efficient component structuring.

Weather Dashboard

Jan 2023

[Live Demo →](#)

Built a front-end Weather Dashboard that fetches and displays real-time weather data for global cities via the OpenWeatherMap API, achieving sub-second data retrieval with a responsive UI built using Tailwind CSS.

Social Media Dashboard

Jan 2023

Live Demo →

Created a front-end social media metrics dashboard displaying account statistics and overview cards, using static HTML/CSS and JavaScript for interactivity.

Password Generator

Jan 2023

Live Demo →

Developed a browser-based web utility that generates secure passwords with styled UI controls for parameters and JavaScript handling generation and clipboard actions.

AI Research Paper Project

2025

Conducted research on AI applications and published a technical paper on arXiv, utilizing Python and NumPy for data processing and numerical analysis. Developed as part of a college research initiative, focusing on optimizing algorithmic performance for specific AI use cases.

CERTIFICATIONS & ACHIEVEMENTS

Programming for Everybody (Getting Started with Python)

Apr 2026

University of Michigan

Introduction to HTML5

Apr 2024

University of Michigan

Introduction to Android Mobile Application Development

Apr 2023

Meta

Bharatiya Antariksh Hackathon 2025

ISRO

Trained machine learning models and developed the front-end interface for the project. Collaborated with the team to deliver a functional solution for the ISRO-led national hackathon.

Aug 2025

HOBBIES & INTERESTS

Exploring New Software

Experimenting with AI Tools

Playing Games

Discovering New Foods

LANGUAGES

English (Working Proficiency)

Hindi (Fluent)
